The members of Mt. Zion United Methodist Church welcome you to the community and extend the right hand of fellowship to those who are seeking a church home. There are many folks here in our church who are just like you. We welcome you with **Open Hearts, Open Minds and Open Doors**. Come join us!

God has blessed Mt. Zion with willing workers, programs that meet the needs of its members and the community, and a beautiful church and new education building.

For more information, call the Church telephone number above or send e-mail to zionmyer@gbgmchurches.gbgm-umc.org

The **Wunder Banjo Company's** goals are to reproduce the most historically accurate and highest quality early to mid 19th century banjos, and to preserve the 19th century sound, music, and style of America's most important folk instrument.

The sound produced by our instruments has been tested against originals and is correct in tone, character and volume. Only materials, tools and construction methods available to 19th century craftsmen are used. Each Wunder banjo is handcrafted using originals, period photos and paintings as patterns as well as customer's special requests. You will both play and display our banjos.

Wunder Banjos are the most historically accurate reproductions.

**Note as of August 2, 2003 Wunder Banjo is not taking any new orders for instruments.
Please check back with us in a few months.**

Thank you for your interest.

Ordering Information: Call us at: (301) 293-9624
E-mail us at: George@WunderBanjo.com
Write us at: P.O. Box 233, Myersville, MD 21773

Near Maryland? Stop by our workshop behind 206 Main St., Myersville. We're just off Hwy 70 at exit 42, 10 miles west of Frederick.

George Wunderlich - Banjo Maker and Historian

George Wunderlich is recognized as an expert in 19th century minstrel music and banjos. He builds banjos for musicians, museums, historians, collectors, and re-enactors all over the world. His drive for historical accuracy has taken him to the Smithsonian Institution, Metropolitan Museum of Art, NYC and the Library of Congress. He has researched the instruments, the music and the people of the 19th century. He is co-curator of a banjo exhibit at the Katonah Museum in New York that is scheduled to open in the fall of 2003.

George has a passion to share his love of history with others. He has enriched learning for students of all ages for nearly 20 years. His energy and knowledge have made him a favorite speaker to schools, clubs and organizations nationwide. In 2002 he was a presenter for the first time at the International Bluegrass Music

Association's Fan Fest in Louisville, KY. George is currently the Executive Director of the National Museum of Civil War Medicine. He is also Scoutmaster of Boy Scout Troop #217.

Please call or e-mail for more information.

Town of Myersville, Maryland

Planning, Zoning, and Building Permit Information

The final draft of the Myersville Comprehensive Plan, which incorporates comments on the initial draft from the public hearing in the summer of 1998, was approved by the Town Council on November 14, 2000, with two directed changes:

- that an eight vision statement regarding adequate public facilities, as required by a new Maryland state law that became effective on October 1, 2000, be added to the plan; and
- that the growth limit boundaries shown on the land use plan map be expanded to coincide exactly with the boundaries shown in the currently-approved Frederick County Comprehensive Plan.

A copy of the approved plan will be made available here as soon as the two changes above are made to the final draft. In the interim, you can [click here](#) to view the final draft of the Myersville Comprehensive Plan.

A revised schedule of fees for review of documents required by subdivision and land use (zoning) regulations was approved by the Mayor and Council on June 13, 2000. [Click here](#) to view the current fee schedule.

Although it is in Frederick County, the Town of Myersville is an independent authority for planning, zoning, and building permits. The Town's ordinances and regulations in these areas are similar to, but not identical with, those of Frederick County. The Town has its own Planning Commission and Board of Zoning Appeals. Members are appointed by the Mayor for terms specified in the Town Charter. Current members (with the date their term expires) are:

Planning Commission	Board of Zoning Appeals
Mark Etheridge, Chairperson (2005)	William Talbott (2005)
Michael Collins (2005)	John Brown - Chairman (2005)
Carolyn Burlebach (2004)	Paul Leatherman - Ex Officio (2005)
Jeffrey Woods - Ex Officio (2005)	Joseph F. Brown (2005)
	Bill James - Alternate - 2005

Professional planner and Zoning Administrator Kristen Aleshire, who can be contacted by leaving a message at the Town office at (301) 293-4281, can provide information on zoning ordinances, variance requests, etc., and is the point of contact for initiating a variance request or for having business placed on the Planning Commission's agenda. Any questions regarding interpretation of the zoning ordinance or subdivision regulations, or situations that do and don't require a building permit, should be referred to Mr. Aleshire.

Through inter-agency agreement, Frederick County employees administer building permits and inspect new construction on behalf of the Town. Building permits are issued in Winchester Hall on Church Street in Frederick. Information on the process and required documents can be obtained by calling the County at 301-631-2313, or visit their [web site](#).

Myersville zoning ordinances and subdivision regulations are included in the Myersville Code of Ordinances, which can be downloaded from this web site as an Adobe Acrobat file. [Click here to view or download the Myersville Code of Ordinances.](#)

Town of Myersville, Maryland

Trash Collection and Recycling Information

Myersville contracts with a private company to provide curbside trash pickup twice a week at all residences within the Town limits. Pickups are early morning on Mondays and Thursdays, including all Holidays except Christmas. For questions or comments on trash collection service, call the Town Office at 301-293-4281.

Curbside recycling is provided by Frederick County's contractor. Large recycling bins are also provided by the County in the Park-and-Ride lot south of I-70 on Ventrie Court. Myersville Sunoco participates in the County's used oil recycling program, and accepts used engine oil.

The County also provides bulk trash (large item) pick up service on an irregular schedule, typically twice a year, but you must call to schedule a pick up prior to the day when it is scheduled for Myersville.

For more information about bulk trash, recycling, or other similar services provided by Frederick County, see the Frederick County listings in the blue pages of the phone book or visit their web site.

Town of Myersville, Maryland

Water and Sewer Information

The Town of Myersville Drinking Water Quality Reports for 2000, 1999 and 1998, required by the Safe Drinking Water Act of 1996 and sometimes also referred to as the "Consumer Confidence Report," are available for your review. Follow these links to view the reports:

[2000 Consumer Confidence Report](#)
[1999 Consumer Confidence Report](#) [1998 Consumer Confidence Report](#)

Please contact Town Hall at 301-293-4281 to request connection, disconnection, or changes in service, or for repair service. The number to call for emergencies is provided on a recording at that number when there is no one present to answer the phone.

Notice: Myersville does not add fluoride to its water. Some medical professionals believe that including fluoride in the diet of children and young adults is important for dental health. Prescription Fluoride supplements are available at nominal cost. If you have questions about the need for a fluoride supplement for your children, you should discuss this with your dentist or pediatrician. Follow this link for current information on fluoride from the American Dental Association.

Water meters are read quarterly. Water and sewer charges are billed quarterly at the following rates. Please note that the rates in the table are separately applied for water and sewer service. That is, your water and sewer bill will be twice the amount indicated in the tables.

Residential Service	In-Town Rate	Out-of-Town Rate
First 3,000 gallons/quarter	\$42.90	\$72.90
Next 7,000 gallons/quarter (up to 10,000 gallons)	\$2.17/1,000 gallons	\$3.56/1,000 gallons
Next 12,500 gallons/quarter (up to 22,500 gallons)	\$2.57/1,000 gallons	\$4.37/1,000 gallons
Over 22,500 gallons/quarter	\$2.96/1,000 gallons	\$5.34/1,000 gallons

Non-Residential Service	In-Town Rate	Out-of-Town Rate
First 3,000 gallons/quarter	\$43.95	\$87.75
Next 12,000 gallons/quarter (up to 15,000 gallons)	\$2.40/1,000 gallons	\$4.80/1,000 gallons
Next 30,000 gallons/quarter (up to 45,000 gallons)	\$4.38/1,000 gallons	\$8.76/1,000 gallons
Next 65,000 gallons/quarter (up to 100,000 gallons)	\$5.10/1,000 gallons	\$10.20/1,000 gallons
Over 100,000 gallons/quarter	\$6.30/1,000 gallons	\$12.60/1,000 gallons

Water and sewer bills are due on receipt. The maximum amount allowed by law is charged for any check returned for non-payment. If not paid in the month after billing, a late charge of 1.5% of the balance is assessed for each month in arrears. If not paid within 75 days, your service will be disconnected and you will be charged a \$75 disconnection fee. To restore service, you must pay all outstanding charges plus a \$50 re-connection fee.

Where does our water come from?

The Myersville Water System consists of seven springs, a low water impoundment, wells, a water treatment plant and a network of 6 to 12 inch water lines. The springs, impoundment and wells make up the raw water sources for treatment. The seven springs are located on South Mountain and were developed as part of the original public water supply in 1937. Approximately 28,000 gallons per day is supplied from the seven springs, which flow by gravity into the Town's impoundment north of U.S. 40. A 6 inch force main delivers the water to the Town's reservoir and water treatment plant north of the intersection of Easterday Road and Canada Hill Road. On the grounds of the Town's reservoir is also a well that can pump about 29,000 gallons per day. The water source also includes the low water impoundment on Little Catoctin Creek which is permitted to withdraw 40,000 gallons per day, and an adjacent well (about 10,000 gallons per day) which also is pumped to the Town reservoir and water treatment plant.

Additional water sources have been added to the Town system in the last 8 years through developer contribution of groundwater wells. These groundwater wells are located in the Ashley, Canada Hill and Deerwoods subdivisions and in the Doubs Meadow Park, and collectively add about 150,000 gallons per day. These groundwater resources are treated and incorporated into the water conveyance system. The water lines are generally 6, 8 or 12 inch lines with a few older lines with a smaller diameter. Water lines are generally extended to serve new development at the expense of the developer.

The new Myersville Water Plant went is fully operationally as of November 1, 1999, and is designed to treat 144,000 gallons per day (gpd). Current water use in Town is about 125,000 gpd during peak usage months in the summer. State figures used to estimate water usage per household is 150 gpd. With about 400 residences connected to the system in mid-1999, the state figures would suggest a needed supply capacity of about 100,000 gpd for residential water use. The Town currently can store 300,000 gallons of treated water.

...and where does it go?

The Town sewer system consists of a single sewage treatment plant, five sewage pump stations and the network of sewer lines from 2 inches- 8 inches in size.

The sewage treatment plant (STP) is located along Grindstone Run on the north side of Milt Summers Road, south of Interstate 70. Flows at the plant have recently been 120,000 gallons per day (gpd) although records from the Maryland Department of the Environment show a combined 1995 and 1996 flow of 176,000 gpd and a 1996 flow of 196,000 gpd. The plant is permitted for 150,000 gpd. The original design capacity of the plant is twice the current permit levels and a project to expand the capacity of the plant from 150,000 to 300,000 gpd has now been functionally completed.

The Town's sewage treatment plant effluent is disinfected with ultraviolet light - no chemicals are added.

What is the Town doing to ease the shortage of water?

A feasibility study for a large surface water impoundment north of town has been proposed. In addition, to address the poor performance of the Ashley wells, the Town conducted a siting study to attempt to locate favorable sites for new wells, and dug test wells at these sites in the summer of 1999. One of the test wells had sufficient yield to warrant putting it into production, and approval to do so was received from the Maryland Department of the Environment in the fall of 1999. This new well will be pumped

to the previously under-utilized water treatment facility in Ashley. Two additional wells were dug in the Canada Hill development in early 2000, with one having an preliminary yield that appears promising.

What can I do to ease water shortages?

With the recent addition to its water supply, Myersville is likely to experience water shortages only if there is a prolonged drought in the summer. Probably the most important thing you can do if this occurs is to **not water your lawn**. It won't die, grass will come back unless you have a variety that is not well adapted to the area. There have been many before us who have learned by trial and error what works and what doesn't in regard to water conservation. A wealth of information is available on the Waterwiser web site. This site is jointly sponsored by the American Water Works Association and the Environmental Protection Agency, and includes information that you can use to compare you own household water consumption with national averages as well as estimate the potential savings from installing post-1994 water-conserving plumbing fixtures.

annually. In addition to the residential solid waste which is not recyclable, a curbside recycling program in Myersville has collected 121.4 tons over a two year period in 1994-95.

Protective Services

Protective services for Myersville include the Myersville Fire and Ambulance Service and the Frederick County Resident Deputy service. The Myersville Fire and Ambulance Company is located on the east side of Main Street (MD Route 17) south of Ellerton Road. The service area for the Fire Company extends west to South Mountain, east to the Hawbottom Road area, south to Station Road and north of Ward Kline Road. The ambulance company has a larger service area since the Wolfsville Fire Company is not associated with an ambulance company. The Myersville Ambulance Company service area extends north of Wolfsville to Garfield Road. The combined number of calls for both fire and ambulance service was 550 calls in 1997.

Law enforcement is provided in Town primarily by the resident County deputy assigned to Myersville on a part time basis through the Resident County Deputy Program. Middletown and Myersville both contract for services with Middletown contracting for 1 1/2 deputies and Myersville contracting for 1/2 of the time of a deputy. Myersville, therefore pays 1/2 the cost of providing the service for one deputy.

Planned Public Facilities Map

Community Facility Policies

- *The Town will consider the adequacy of public facilities to serve new development at the time of annexation*
- *The Town will consider an adoption of an Adequate Public Facilities Ordinance (APFO) which addresses at minimum schools, water and sewer and roads.*
- *The Town will provide land through developer dedication for school sites in accordance with Town and County long range plans.*
- *The Town will consider standards for parkland dedication through the subdivisions regulations with minimum standards to include 10% dedication and useable recreation land*
- *The Town will consider physical connections of open space lands for potential of a greenway/trail system*
- *The Town will consider adoption of a Capital Improvements Plan to provide planning and timing of Town infrastructure needs.*
